

## Seattle

Mahmoud El-Najjar, Department of Anthropology, Case Western Reserve University, Cleveland, Ohio 44106, has now completed arrangements for a symposium on paleoepidemiology to be held as part of the annual meeting of the American Association of Physical Anthropologists in Seattle in April 1977. The list of contributors and the titles of their papers are:

- Marvin J. Allison - Paleoepidemiology of infectious diseases in pre-Columbian and Colonial Peru
- J. Lawrence Angel - Porotic hyperostosis in the Eastern Mediterranean
- George J. Armelagos, J. Lallo and J. Rose - Paleoepidemiology of the Dixon Mound population
- Jane Buikstra and Della Cook - Pre-Columbian tuberculosis: an epidemiological approach
- Michael V. DeSanti - The utility of mummified tissues in tracing prehistoric human disease ecology
- Mahmoud Y. El-Najjar - The epidemiology of skeletal changes in the anemias in prehistoric/historic human populations
- Enrique Gerszten - Harris lines as a tool for evaluating childhood health conditions
- Robert Jurmain - Paleoepidemiology of degenerative joint disease
- Joseph Katich - The etiology of the buccal pit of the human mandibular molars in a prehistoric/historic Pueblo Indian population
- Bonnie Poswall - Coccidiomycosis in pre-Columbian Indian populations in California: differential manifestations of bone lesions
- Louise Robbins - Yaws-like disease processes in a Louisiana Shellmound population
- Dennis J. Ryan - Paleoepidemiology among the Kayenta Anasazi, Northeastern Arizona
- David Van Endt - Amino acid analysis of bone in a suspected case of iron deficiency anemia
- Michael R. Zimmerman - Tuberculosis in Egypt
